

# Ultimate Performance & Versatility

# HX7515

## Powerful

This unit is fit for commercial use. When installed in series, it is ideal to vacuum heavy debris and allows the installation of multiple retractable hose inlets. When installed in parallel, it is perfect to vacuum large surfaces and will remain extra-efficient despite a very long piping system.

## Versatile

The motor unit comprising the second motor can be connected to the main unit by two different intakes. The higher one allows for an installation in series, and the lower one, in parallel. It's like having two vacuum units that give you the best possible results according to your cleaning needs!

## Non-allergenic

All our models are equipped with a Cyclofiltre™ that has been provided with an antimicrobial treatment, so as to prevent the growth of mold, bacteria, and fungi that may be associated with allergies.

## Convenient

Like each of our models, you can use this vacuum unit with or without a bag, at any time! Just remove the bag and the bag adaptor, and the self-cleaning filter of your central vacuum will do all the work!

## Intelligent

Featuring our unique and exclusive DataSync technology, this model allows the selection of four power levels; signals when to change the bag or empty the canister; and even indicate when mechanical maintenance is recommended.

**Save up to 20% energy and prolong your motor's life with the lower power levels.**

## Hygienic

Our unique and exclusive carbon dust filtration system\* captures that fine black dust produced by the motor.

HX7515	ACYX7515K	
	in series	in parallel
Water lift H <sub>2</sub> O	230" 5842 mm	137" 3480 mm
